COFFEE MACHINES
**OneTouch for Two**

Preparation of one or two coffee specialities at the touch of a single button. This function allows two glasses of latte macchiato or two cups of cappuccino, coffee or espresso to be produced at the same time.

**Easily Removable Brew Unit**

The brew unit is the heart and soul of automatic coffee making. It is easily removed and cleaned. This ensures perfect hygiene of the brew unit, producing coffee of the same high quality and longevity of your machine.

**Coffee select**

Our patented CoffeeSelect* ensures maximum enjoyment and top-quality coffee. There are three separate containers for different types of beans – so each coffee speciality is prepared with the right one. You can select the bean types manually or assign them permanently to particular drinks – giving you maximum flexibility.

**Automatic cleaning**

Your Miele coffee machine will take care of cleaning and descaling for you. Effortless removal of dirt and limescale: Miele takes care of cleaning and descaling! Your coffee machine so you can spend your time on more important things.

Only available on CVA7845 models.

**Comfort Clean**

The ComfortClean system makes hygiene very easy. Many of the coffee machine components such as the water container and waste container can be cleaned in a dishwasher.

**Easy Click**

Innovative and only available from Miele. The milk system simply clicks into place at the front and is easily removed.

**Comfort Door**

Easy access: convenient access to bean container, water container, grounds container and drip tray.

**CupSensor**

Ideal distance: the CupSensor recognises the rim of the cup and its motorised height adjustment automatically alters the position of the central spout accordingly.

**Aromatic System**

The dynamic brew unit on Miele coffee machines expands when water flows in, allowing the coffee powder and the water to blend better.

**Coffee & Tea**

Prepares 20 different types of hot drinks automatically. And the best yet: The individual preparation of various types of tea. Whether green or black, herbal or fruit tea: The water is always dispensed at the optimum temperature - for perfect tea flavour.
