Miele@mobile app
App highlights

Miele@mobile app
The Miele@mobile app offers a wide range of functions that enable you to monitor and operate your appliances to achieve the best possible results.

MobileControl
With MobileControl you can select a programme on your washing machine, tumble dryer, and dishwasher even if you are not at home.

Assistants
The interactive assistant recommends the most suitable wash or drying programme. This will ensure perfect results every time.

ShopConn@ct
Regarding supplies, you are informed about the current status of your consumables and can order them conveniently via the Internet.

Recipes
Here you quickly can find the right recipe for every occasion. Incorporated how-to videos make food preparation really easy.

Miele Service
Any questions? Using the Miele@mobile app, you can easily contact us directly by phone or e-mail.
DIALOG OVEN
Dialog Oven

Revolutionary excellence

The Miele Dialog oven will enhance your passion for cooking and is the perfect appliance for the enthusiast who seeks the very best quality. This revolutionary method of cooking will let you cook dishes you never thought possible. Enjoy this new level of excellence, with everything from a simple meal to an entire menu all prepared to perfection.

....and yes, the Dialog Oven can cook a fish in a block of ice.
MobileControl
Keep an eye on things at home or on the go: you can use a smartphone or tablet to check the status of the Dialog oven, monitor the cooking process or stop a programme while you are out and about. Or you can send the settings for your favourite recipe directly to the Miele Dialog oven via the app. For unrivalled convenience, anytime, anywhere.

M Chef
The revolutionary M Chef technology cooks the entire volume of the food from the outset to ensure that it is heated evenly. This is done by supplying energy in the form of Gourmet units. At the same time, the cooking process is monitored and adjusted constantly. This allows you to prepare dishes that wouldn’t have been possible before. You can also just use the conventional functions if necessary.

Gourmet Pro
Cook your food just the way you like it: the Gourmet Pro programme allows you to set all of the parameters individually. The Miele Dialog oven will prepare everything in line with your precise specifications.

Expert advice
Optional assistance: the Gourmet Assistant is a virtual expert that offers you advice while you are cooking. Based on the nature and weight of your food, the Gourmet Assistant will suggest the appropriate intensity, function, temperature and number of Gourmet units. This offers you unparalleled convenience: simply confirm the settings to enjoy perfectly prepared meals.

Gentle defrosting
With the Miele Dialog oven, you can defrost food at short notice so there is no need to plan ahead: food is defrosted quickly, gently and evenly, with no parts staying frozen or starting to cook. This allows you to defrost frozen cakes, bread or meat in no time at all – should you receive spontaneous visitors, for example. The quality of the food is preserved and the texture and appearance are unaffected.

OVEN KEY FEATURES
Ovens at a glance

Moisture Plus
Increasing the humidity in the oven optimises cooking of a variety of foods: soft, delicious smelling bread with a shiny, appetising crust; bread rolls and croissants as delicious as those from the local baker; succulent, tender meat with a nicely browned crust, perfect oven bakes, delicious soufflés and so much more.

FlexiClip runners
The fully extending runners allow baking trays, baking and roasting racks and gourmet oven dishes to be pulled completely out of the cooking compartment and held securely in any position. So you can comfortably baste a roast or turn food over, for example, without the risk of burning yourself on the hot oven interior. Versatile use at every level.

FoodView
How is your bake doing? The camera in the oven compartment will show you what is happening – wherever you are, using any compatible mobile device or tablet.

TasteControl
Perfectly cooked: after a time-controlled process, the oven compartment is cooled down to stop the food cooking.

Pyrolytic cleaning
Pyrolytic cleaning is an automatic process in which residue in the oven is incinerated to ash at a very high temperature. This makes arduous scrubbing and abrasive cleaners a thing of the past. The pyrolytic self-cleaning feature turns all food residue to ash which can be easily removed from the oven surfaces without a trace.

PerfectClean finish
Cleaning made easy: Many components in your Miele oven, oven interior, baking trays and baking and roasting racks, have a patented surface finish with unique non-stick properties. Persistent soiling is easily removed using water with a dash of washing-up liquid and a sponge.

MotionReact
You can control your oven without pressing a button. Approach the appliance, the oven compartment will light up alternatively the display will switch on based on your preference.

Wireless food probe
Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. No more need to supervise the cooking process. The food probe is very easy to use. The special highlight: It is always at hand, as it is stored in the oven door.

What do the icons mean?

**Microwaves at a glance**

**Popcorn Button**
Prepare perfect popcorn at the touch of a button. Times and wattages are tailored to prepare a 100 gram packet of popcorn. The pre-programmed times can be modified to suit your personal taste.

**Automatic programmes**
With electronically regulated programmes for over 100 international dishes, you can cook and bake cakes, bread, meat, etc. to perfection. No need to programme the mode or temperature and duration. In addition, the degree of cooking and the browning level can be adjusted.

**Capacity**
The ovens offer a 43 litre or a 46 litre cabinet. Which offers ample space for both cooking & baking.

**CleanSteel**
Features are particular high grade CleanSteel finish. This allows for easy cleaning and fingerprints are barely visible.

**Food probe**
Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. No more need to supervise the cooking process. The food probe is very easy to use.

**Energy efficiency**
Miele appliances convince with extremely low energy consumption. A large percentage of Miele cookers and ovens are categorized in energy efficiency class A+. This protects the environment - and your household budget.

**PerfectClean finish**
Cleaning made easy: Many components in your Miele oven, oven interior, baking trays and baking and roasting racks, have a patented surface finish with unique non-stick properties. Persistent soiling is easily removed using water with a dash of washing-up liquid and a sponge.

**Controls**
Convenient user friendly control panels are operated quickly & intuitively by simply touching or swiping the clear text display.

STEAM COMBINATION KEY FEATURES

Combination ovens

**Multi Steam**
Optimum steam distribution via 8 inlets. The powerful steam generator ensure fast steam as well as shorter heat up times. The distribution of steam around the cooking containers achieves faster uniform cooking result.

**Automatic programmes**
For cooking various types of food. Simplify your everyday tasks, manual selection of temperature & duration is not required. With Automatic menu cooking, the temperature cooking time and sequence in which dishes are added are automatically controlled. Menu Cooking makes life easier by cooking 3 different food types at the same time.

**Lift-Up Fascia**
The Lift-Up door allows horizontal & vertical combinations with many other Miele built-in appliances. The water container is situated here.

**Capacity**
No other Steam oven provides as much space. With 3 to 4 cooking levels. Allowing you to cook a complete menu for several people in one process.

**Combination cooking**
You want food that is succulent on the inside, crispy on the outside? Combination cooking provides results entirely to your taste.

**Automatic menu cooking**
Cook several components at the same time: temperature, cooking time & sequence are determined automatically.

**Mix & Match**
Delicious dishes in the twinkling of an eye: with Mix & Match you can cook different foods on one plate at the same time.

**Wireless food probe**
Customised and precise roasting of meat, fish and poultry by monitoring the core temperature and the countdown indicator. No more need to supervise the cooking process. The food probe is very easy to use. The special highlight: It is always at hand, as it is stored behind the fascia panel.

### Design
- 14 cm built-in warmer drawer
- Handleless design
- Glass fronts

### Performance
- Mobile Control
  - Wifi enabled
- Slow cooking
  - Soft & tender results
- Keep warm
  - Perfect for crockery & food
  - Touch control
  - Convenient and easy
- Push2Open
  - Easiest handling
- Fully telescopic runners
  - Easy loading and unloading

### Specification
- 4 operating modes
  - Temperature (40-85 degrees)
- x1 stainless steel rack

---

### Touch Control
All Miele Gourmet drawers are operated by controls under the flush glass fascia. For convenient use & easy cleaning. You can select 1 of 4 temperatures within the temperature range of the chosen mode. Timers can be set and switches off automatically at the end of the programmed time.

---

### Slow Cooking
Low temperature cooking is a professional method of food preparation, giving high quality, tender & juicy results on meat. The meat can be sliced directly after cooking.

---

### SoftClose
Using this mechanism, the fully telescopic runners glide gently & quickly back into their original position. Crockery & dishes remain in their place, thus spilling is prevented.

---

### Push 2 Open
Miele built in drawers without handles are perfectly in-line with built-in appliances. The drawer opens wide, making loading & operating easy.

The drawers are easy to open by hand or if you do not have a hand free when carrying crockery, use your knee or elbow.
GOURMET DRAWERS KEY FEATURES

Vacuum sealer drawers

Food storage
Vacuum-sealed foodstuffs stay fresh for longer. They are stored in the PerfectFresh zone in the fridge on a temporary basis. However, once vacuum sealed, fish and vegetables stay fresh for longer, without compromising on taste or quality. Vacuum sealing protects food against freezer burn, or contamination via smell or flavour. Not least of all, bread and rolls remain fresh for much longer at room temperature once they have been vacuum sealed.

Marinating
Do you like your meat and fish to have a really intense flavour? Marinate your food in your usual manner and then vacuum seal it with the Miele vacuuming drawer. By vacuum-sealing the taste of the marinade is greatly intensified, since flavours do not oxidize. The herbs and spices can work directly and in a very concentrated form on the food.

Re-sealing
After an evening in front of the TV with crisps and popcorn there are often some opened bags that have not been finished. What should you do with them? The vacuuming drawer offers the perfect solution: It seals the original packaging gently and securely on setting 1. This means that foodstuffs are protected against contamination via taste or smell. So they’re just as fresh the next time around.

Easy-care interior
Easy cleaning guaranteed.
The vacuuming chamber is equipped with seamless stainless steel sheets. This means that it is particularly easy to clean after use.

CleanSteel
All Miele appliances in stainless steel have a premium CleanSteel finish. This finish allows the surface to be kept clean very easily and without special detergents. Fingerprints are nearly invisible on CleanSteel.

Vacuum bags suitable for food
Safety is a priority.Supplied with different sized plastic bags. They are food-safe, heat-resistant, boil-proof and tear-resistant and contain no plasticisers. Food is safely stored. Transfer of flavours is prevented. Additional vacuum bags are available to purchase from the Miele shop.

Vacuuming
Ideal conditions for longer storage life. In the Miele vacuuming drawer the oxygen and air are removed from the vacuum bags. This creates the ideal conditions for the longer storage of foodstuffs and also the perfect preparation for sous-vide cooking in the steam combination oven. A choice of three vacuuming settings is available to suit your needs. Setting 3 is ideal for marinated meat, whereas setting 1 is perfect for delicate foodstuffs such as berries.

Generous usable area
Versatile vacuuming. The Miele vacuum sealing drawer is suitable for different sizes of bags and containers. The interior space is big enough for all sorts of food from small portions up to a maximum size of 250 x 350 mm and a height of up to 80 mm.
