# MASTERCool 2.0

# REFRIGERATION KEY FEATURES

## MasterCool Fridges & Freezers

MasterCool

### Welcome to Miele's Exclusive Refrigeration product.

High-end design and technology on a large scale. With the development of the large-capacity MasterCool appliances, Miele has new standards. High-end design, impressive innovations and inimitable convenience features are combined in refrigeration appliances of the highest calibre.

### MasterCool – Push2Open

Miele MasterCool refrigeration appliances with the Push2Open function open as if by themselves. The opening system is activated by light pressure on the door. The door opens gently and allows you to reach inside and open it completely. Miele MasterCool refrigeration appliances with Push2Open do not need handles and can be perfectly flush-fitted and integrated into every kitchen and living environment.

### Impressive lighting

BrilliantLight perfectly illuminates the interior cabinet of your Miele appliance – even if it is filled to maximum capacity. This is down to the high-quality LED strips in the side walls of your Miele MasterCool appliance. The light comes on gently as soon as you open the door, giving you a perfect view of your food.

### MasterCool – IceMaker

Ice cubes for cold drinks! Ice-cool drinks professionally and quickly. The automatic IceMaker can produce up to 150 ice cubes a day.

### MasterFresh

The drawers of your Miele MasterCool appliance provide the perfect climate for the gentle storage of your food. Thanks to the innovative MasterFresh function, the refrigerator temperature is particularly low, so that vitamins and minerals are preserved for a long time. The air humidity is also perfectly adjusted to suit fruit, vegetables, dairy products, fish and meat. This ensures that food stays fresh for up to three times longer.

# WINE CONDITIONING

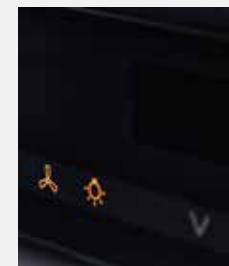

## Refrigeration Wine Conditioning features

### Push2Open

At the touch of a finger tip the door opens slightly. This allows it to be opened gently. The door closes just as softly to prevent any shuddering.

### DynaCool

The integrated fan ensures that air circulates evenly resulting in uniform temperature & humidity levels.

### Sommelier Set

Sommelier set can accommodate decanters, glasses & open wine bottles. Used to keep bottles in their perfect temperature. The wine glasses can be chilled as well.

### FlexiFrame

Just one movement: Move individual slats so that large wine bottles are easy to store.

# Refrigeration
