Vacuum Cleaners

Cordless Handstick Range

3in1 concept

Ultimate flexibility for any situation. Enjoy the ultimate in flexibility: The PowerUnit of your Miele Triflex HX2 vacuum cleaner can be positioned at the top or bottom. This enables you to get under flat furniture easily or to vacuum large areas effortlessly. The PowerUnit can also go solo in an instant: The perfect way to vacuum the car seats or sofa in next to no time. As you can see, the configuration concept of the Triflex HX2 adapts to suit your needs perfectly.

Maximum range

All kinds of possibilities: whether you need to vacuum underneath low furniture or get the dust off the ceiling, with the Triflex HX2 PowerUnit positioned at the top you have maximum flexibility. It makes it really easy to get under beds or cabinets with the vacuum cleaner – for a perfectly clean home.

Effortless

Perfect for large areas: Position the PowerUnit at the bottom of your Miele Triflex HX2 vacuum cleaner. This is a really convenient way of vacuuming large rooms or areas - such as long hallways or spacious living rooms. This lightweight design makes your vacuum cleaner really easy to hold and in case you need to take a break from vacuuming, it also features a self-standing function.

Easy handling

You just want to vacuum some crumbs off the couch or free the car seats of dust? With the solo PowerUnit it's an absolute breeze: It detaches really easily and can be used independently of the suction tube and Electrobrush. It is always at the ready - saving you time, while still cleaning efficiently.

Fresh Air

With the HEPA * Lifetime Filter, you can create a hypoallergenic zone with your own four walls. It captures and filters 99.99% of all microscopic particles and allergens - removing them from the air. As a result allergy sufferers will be less affected by pollen or household dust.

Electric brush Multi Floor XXL

Cleans beautifully: The Electrobrush for the Miele vacuum cleaner is 28cm wide, allowing you to clear large areas of dust in next to no time. At the same time, the special airflow concept ensures powerful suction. The intelligent brush immediately detects the type of flooring: As soon as you start vacuuming carpets, the power increases automatically.

CYLINDER RANGE BAGGED VACUUMS

Versatility always on board

Miele cylinder vacuum cleaners are equipped with three high-quality, standard attachments: upholstery nozzle, crevice nozzle and dusting brush. They are stored dust-free inside the appliance or on a Vario-clip, and they are always conveniently within reach.

Cat & Dog | Allergy

For true pet lovers. Thanks to its special accessories, it is ideally suited to cater for the requirements of households with pets. The Allergy vacuum cleaner offers the highest hygiene requirements. Ideal for people who suffer from allergies & sinus problems.

Active AirClean

The Activated Charcoal filling ensures that any smells or bad odours from the dustbag are absorbed before it leaves the cleaner, and the exhaust air is always fresh. Odour Absorption allows for effective filtration with timestrip filter replacement indicator.

Hygiene

Miele vacuum cleaners offer exceptional filtration based on a multi-stage system. It consists of the innovative Miele HyClean dustbag, motor protection filter and Miele exhaust filter. The interaction of these components ensures that more than 99.9% of fine dust is filtered. So you can breathe with ease!

HEPA AirClean filter

With Miele, you can choose from three different exhaust filters. The HEPA AirClean filter retains even the smallest particles. The timestrip lets you know when the filter should be changed.

BLIZZARD

Vortex Technology

The Vortex technology produces an enormous flow velocity of more than 100km/h. Combined with the specially designed floorhead and the aerodynamic air flow, the bagless vacuum cleaner achieves first-class cleaning performance. This ensures that both coarse and fine dust are separated in an outstanding manner.

HEPA Lifetime Filter

With the HEPA lifetime filter, up to 99.99% of the smallest particles of fine dust and allergens are retained by the system. Perfect for people who suffer from allergies.

ComfortClean

Special sensors measure the air throughput of the GORE CleanStream fine dust filter and automatically activate the ComfortClean self-cleaning function as needed. To complete this, the appliance switches off for about 20 seconds. The ComfortClean function can also be activated manually.

Hygiene Lifetime Filter

The Hygiene lifetime filter features very high dust retention capacity and collects 99.98% of all fine particles. This is the type of hygienic cleanliness that you want for your home.

Click2open

The dust container can be removed by pulling it upwards by its handle. The container is then opened by pressing the "Empty" button. Once open, the collected dust simply drops out.

BOOST CX1 VACUUM CLEANER

Top class suction in the smallest of spaces

Superior cleaning performance

All bagless vacuum cleaners from Miele have a 3-stage filtration system. On the Boost CX1, air passes through the following filters: Dust container with Vortex Technology, fine dust filter and exhaust filter.

Dust container with Vortex Technology

The compact design ensures extremely low airflow and guarantees that the Boost CX1 achieves excellent dust separation. As a result, a very large proportion of soil remains in the dust box. Finer dust is held back by the next filtration stage, the fine dust filter.

Precise and nimble with TrackDrive

Miele Boost CX1 is easy and precise to manoeuvre yet remains nimble and able to turn on the spot.

Quality

It is also tested for a life cycle of 20 years. In very many respects, Miele quality tests surpass the requirements independent test institutes.

SCOUT ROBOT RX3

RX3 Scout - Arriving 2nd Quarter 2022

3D Smart Navigation

Intelligent navigation - 2 front cameras enable high-precision 3D object detection for comprehensive cleaning.

120 min non-stop

Thanks to a powerful lithium-ion battery, the Scout runs for longer on a single battery charge. If the battery charge is not sufficient, the scout returns to the base station for recharging. It will then continue cleaning from the location where it had stopped - fully automatically.

Home Vision HD

Real time viewing: Encrypted live image transmission from the front camera to a mobile device in HD quality.

Quattro cleaning power

Efficient suction system for every floor
Strong on carpets and hard floors: 4-stage cleaning system with 4 cleaning modes for perfect dust absorption.

Corner brush

Clean everywhere: The swivelling 20-armed side brushes protrude over the device and reach every corner.
