A FUEL TO SUIT YOUR HOME

We have compiled a short guide to help you decide what fuel type is best for you and suits your needs.

ELECTRIC

Electricity is the most versatile and easily controlled form of energy. It is increasingly produced from renewable sources, such as wind, water and sunlight.

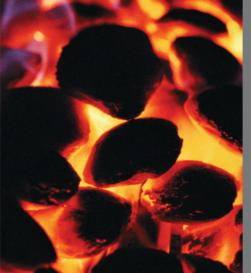

AGA stoves in electric include our Ellesmere EC and Ludlow EC stoves.

GAS

Natural gas is environmentally friendly because it burns more cleanly than other fossil fuels. Natural gas is extremely reliable, and offers controllable power in your appliances.

Our Ellesmere EC and Ludlow EC stoves are available in natural gas and LPG models are also available for more remote locations.

SOLID FUEL

produces a fantastic glowing flame, approved smokeless fuels are low emission and environmentally friendly.

Solid fuel is an efficient and economical method of heating your home 24 hours a day, whatever the weather. There are a wide range of fuels available and, in general, homes heated by solid fuel stoves can benefit from reduced condensation - helping to eliminate household mould.

WOOD

A renewable resource and the most environmentally friendly fuel to burn.

Nothing can compare with the roar and crackle of a real wood fire.

AGA stoves are clean burning and highly efficient. Burning timber is cost effective and helps to conserve fossil fuels. For the best effect, only dry, seasoned timber should be used. You can recognise dry wood by the fact that the bark comes away easily. Fresh green wood can have a moisture content of up to 90%, which makes it slow to ignite, produces steam, reduces the efficiency of the stove and can lead to excess sooting, which in turn, reduces the visibility of the flame picture and increases particulate emissions to the environment.

TESTED AND TRUSTED

AGA Stoves are designed manufactured and tested to meet the highest levels of compliance.

AGA Stoves meet all current and future legislation, class leading efficiencies including Stoves which are 2022 ECO compliant.

All of our AGA stoves are third party approved covering safety and performance and carry the CE mark.

Our approvals are all carried out in the UK. All Solid Fuel, Multi Fuel, Wood and Electric stoves have been certified by Kiwa UK for your complete peace of mind.

FIND YOUR IDEAL STOVE

There are a number of factors to consider when deciding on which stove will be best suited to your requirements:

- Size of room/property to be heated our handy guide at the foot of this page will help your initial thoughts on heat
- Fuel type available to you, or preferred.
- Do you live in an area subject to smoke control regulations?

The AGA stove collection has many options available to you, there are however a number of more technical issues that do need to be considered as well and these are best addressed by contacting one of our recognised AGA Stove retailers for

Stove products, in particular the solid fuel and gas appliances, require a full assessment to be made so that consideration can be given to -

- Heat outputs of the stoves compared to the heat requirement of the location you do not want to be either too hot, or
- The location within the property.
- The availability or the provision of suitable flue arrangements.
- Meeting any required ventilation requirements.
- Fireplace construction/floor protection.

The AGA Stove Retailer will offer -

- Presale surveys to check suitability of the chosen appliance, its positioning and fluing.
- Professional installation by their own or recognised sub contract engineers who hold the required technical qualifications.
- Provision upon completion of all appropriate documentation installation certificates for your home information pack –
- Peace of mind with a full back up service should the need arrive with warranty cover and or the provision of an annual servicing going forward.

Great stoves deserve competent and correct installation so that you can be sure they are functioning as they were designed to do. That way, you can enjoy your stove and rest assured that it is working to the best possible standard.

Contact your AGA Stove Specialist on

01952 642070 or go to **agaliving.com**.

To find out which Stove is your perfect match, measure your room, then use this calculation to find your room size in metres³ and the heat output in kW of the stove.

Still not sure which AGA Stove is right for you?

Call your local AGA Stove dealer on **01952 642070** who will be able to help you select the right stove for your home.

WORKING WITH CASTIRON

To make a stove which is both beautiful to look at and practical to run, you have to start with the right materials - a high quality metal, which is precision cast and expertly finished by skilled craftsmen.

BEAUTIFUL DESIGN FEATURES

The beautiful cast iron panels of an AGA stove are individually moulded in a hand finished 'cast'. This means that we can create the gentle curves and exquisite design details which are the hallmark of a high quality stove.

EXCELLENT HEAT RETENTION

Cast iron is renowned for its heat retention properties, which is why we use it in our world famous AGA cookers. The heat stored whilst the stove is lit continues to be released into the room, long after the embers have died away.

OUTSTANDING BUILD QUALITY

Our stoves are manufactured to the highest possible standards. They carry the CE mark, meaning that they comply with the essential requirements of the relevant European health, safety and environmental protection legislation. They are also all HETAS listed with a five year parts and one year labour warranty.

*Does not apply to consumable items; glass, bricks etc.

CONTEMPORARY STOVES

WORKING WITH STEEL

The AGA Contemporary stoves are truly exceptional. These stoves are designed to the highest standards and are manufactured from high grade steel, which allows us to produce truly inspiring designs that will be sure to attract attention in any space. With a variety of styles, sizes and outputs not to mention excellent efficiencies, there is a model to suit every home.

BEAUTIFUL DESIGN FEATURES

smooth lines and exquisite curves. Some stoves deliver the highest efficiencies. AGA Contemporary stoves are also external air ready*, meaning that they can be installed in such a way that an outside air supply can be channelled directly into the stove.

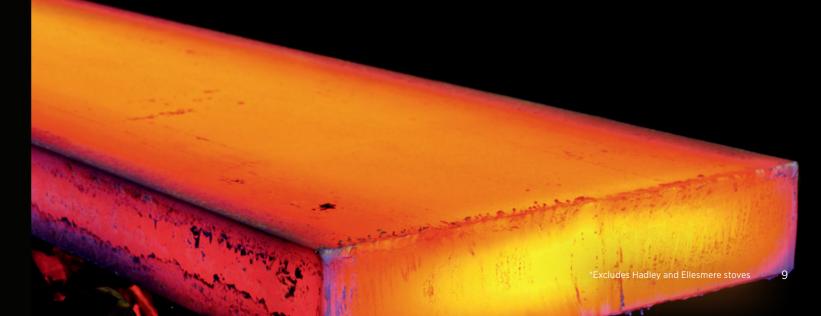

EXCELLENT EFFICIENCY

Clever door opening features, breathtaking Cutting edge engineering ensures AGA Contemporary stoves are built to

OUTSTANDING BUILD QUALITY

flame pictures not to mention strong, that the AGA Contemporary steel last. All models are vigorously tested and engineered to ensure they are easy to control and a pleasure to use, whilst providing a stunning flame picture.

ELLESMERE EC5 & EC5W ELECTRIC

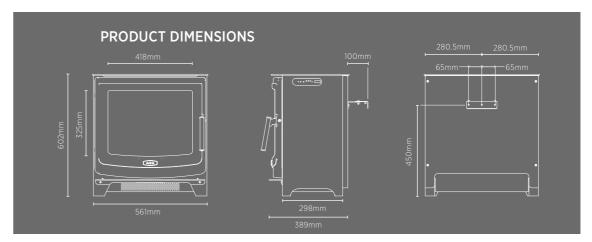

The NEW electric Ellesmere EC stoves from AGA perform brilliantly. Available in 2 sizes, the 5 and the 5Wide, and with heat outputs from 0.9kW to 1.9kW, both models make a stunning statement in your home.

Installation is easy with only a 13 amp supply required and a 12mm plinth* making these easy to site anywhere in your home. You can create your own flame picture by adjusting the flame patterns using a combination of red, blue and yellow options. You can adjust the downlighter in the top of the stove allowing you to create an ambient light on the stove.

The Ellesmere EC comes complete with a remote allowing you to thermostatically control the temperature and programme the stove to your requirements. This range of stoves have a cast iron door and top with steel bodies. There is an option of a cast iron flue collar allowing you to create the look of a wood burning stove in your home. View our video at **agaliving.co.uk.**

You can rest assured that the quality of an AGA stove is guaranteed as all models are manufactured and tested in the UK.

LUDLOW

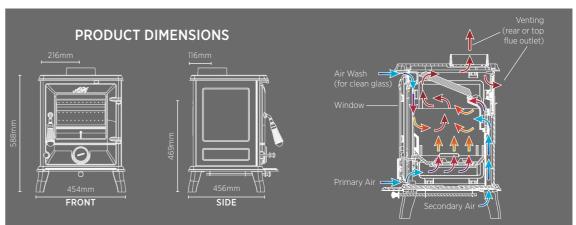

The Ludlow is a medium sized multi fuel stove with a nominal heat output of 6.5kW and an efficiency rating of 76% when burning wood logs. It has a removable shaker grate, ash pan, fire fence and front ash tray. As well as being simple and easy to use, it can be left to burn overnight.

It features the classic AGA black "cool touch" wire handle and will look equally at home in a traditional or contemporary setting.

The Ludlow has been designed to exude a similar look to the existing AGA Stoves range, precisely engineered to give an effective air-wash system. This is controlled with pinpoint accuracy by the dedicated, preheated tertiary air intake.

FUEL TYPE	FLUE	WINDOW	AIR WASH
Solid Fuel and Wood	Top or Rear	Plain	Yes

Please consult your dealer for more details.

RECOMMENDED SOLID FUEL TYPES

Wood, coal, anthracite and peat briquettes (see page 5 for details).

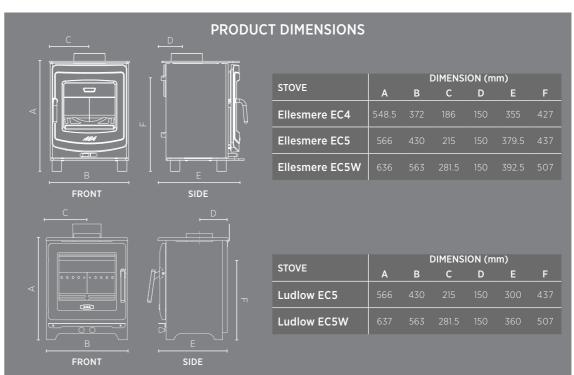

ELLESMERE & LUDLOW EC RANGE

Stoves in this range have steel bodies and cast-iron doors and have the classic good looks the Ellesmere and Ludlow collections are well known for. They have been updated to ensure the very best aesthetics, enhanced performance and, importantly, they're 2022 compliant and DEFRA approved, giving you peace of mind that you have a stove that meets the very latest standards for efficiency and a cleaner burn performance. All of our new stoves achieve an A for energy efficiency with some models achieving A+.

The cleverly designed air control comes in a stunning stainless steel finish and allows you to switch between solid fuel and wood as well as controlling the air intake. The end result is fabulous controllability and a magnificent flame picture.

There are 3 sizes of Ellesmere EC and 2 sizes of Ludlow EC to choose from, and each model has the option of a top or rear flue connection. All models can burn wood and solid fuel.

THE FOLLOWING SOLID FUEL TYPES ARE RECOMMENDED

Smokeless - Ancit, Centurion, Coalite (Nuts), Maxibrite, Phurnacite, Sunbrite (Doubles), Extracite, Blazebrite, Anthracite (Large Nuts), Welsh Dry Steam Coal (Large Nuts), Dry Seasoned Wood.

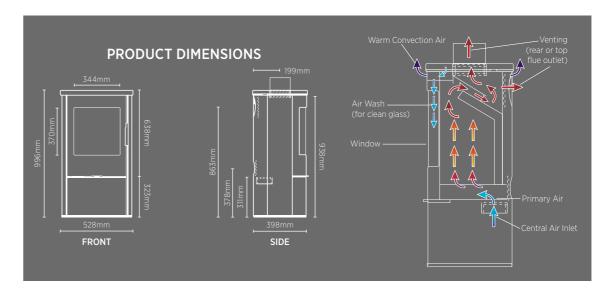

LAWLEY

The Lawley wood burning stove provides a stunning flame picture with simple to use controls. Boasting a nominal output* of 4.4kW and one straight forward control to regulate the air intake, the Lawley is ideal for the family home. The Lawley pedestal stove incorporates a clever rotating feature - perfect for those larger rooms with a number of seating areas, simply rotate the stove to enjoy the great flame picture. With 80% efficiency, the Lawley uses preheated secondary air to ensure the glass is kept clean. The Lawley is also a Smoke Exempt stove, so it is fully approved to burn wood in smoke exempt zones.

 $^* \text{Higher or lower outputs can be obtained by lengthening or shortening the refuelling interval.} \\ ^** \text{When used with a top flue.} \\$

FUEL TYPE	FLUE	WINDOW	AIR WASH
Wood	Top or Rear	Plain	Yes

RECOMMENDED SOLID FUEL TYPES

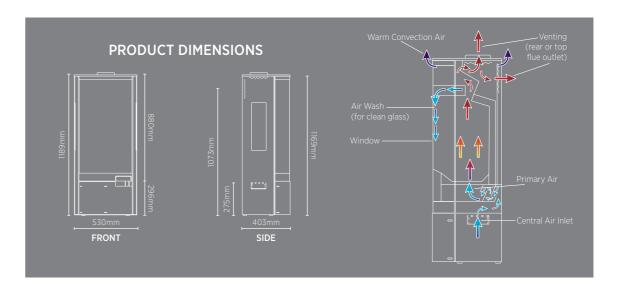

DORRINGTON

A truly beautiful model, the Dorrington wood burning stove adds inspiration to any space it fills. With a high efficiency at 80% and a 6kW nominal output it is ideal for medium and large living areas. The Dorrington features windows on either side as well as an ample front glass to ensure you can see the flame effect from virtually anywhere in the room. With one straight forward control to regulate the air intake, the Dorrington uses pre-heated secondary air to ensure the glass is kept clean. The Dorrington is a Smoke Exempt stove, so it is fully approved to burn wood in smoke exempt zones.

 ${}^* \text{Higher or lower outputs can be obtained by lengthening or shortening the refuelling interval}. \\$

Wood	Top or Rear	Plain	Yes

Please consult your dealer for more details.

RECOMMENDED SOLID FUEL TYPES

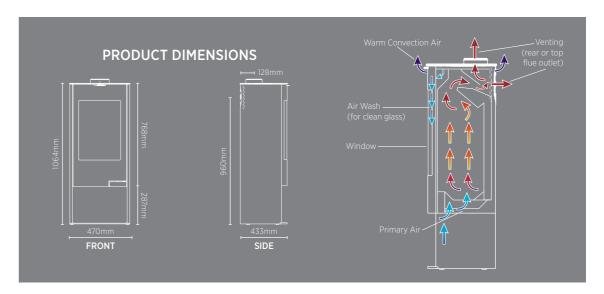

HADLEY

The clean lines of the Hadley wood burning stove will appeal to those looking for an honest, unfussy design. With its impressive height and beautiful flame effect, the Hadley will bring warmth and comfort to the coldest room. A secondary air intake ensures that the glass remains clear for you to enjoy the flame picture and with an 8kW nominal heat output the Hadley will comfortably heat most rooms. With 75% efficiency, the Hadley is a Smoke Exempt stove, so it is fully approved to burn wood in smoke exempt zones. The primary air control is easily reached under the ash compartment.

FUEL TYPE	FLUE	WINDOW	AIR WASH
Wood	Top or Rear	Plain	Yes

Please consult your dealer for more details.

RECOMMENDED SOLID FUEL TYPES

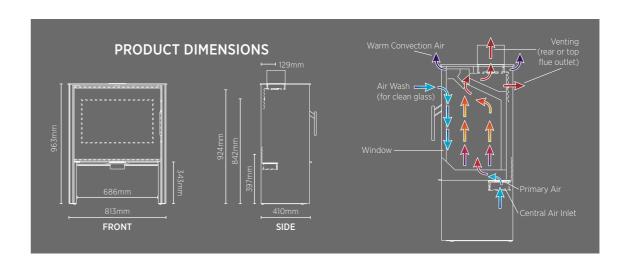

HANWOOD

With its strong lines and large flame picture, the Hanwood wood burning stove makes itself the contemporary heart of any room. Creating comfort and warmth, the Hanwood is a medium sized stove with a nominal output* of 9kW and high efficiency of 79%. Ideal for the family home the Hanwood stove is ultra controllable as well as being Smoke Exempt (fully approved to burn wood in smoke exempt zones), so, wherever you live, the Hanwood will fit right in. You can also store your logs underneath in the handy log store.

*Higher or lower outputs can be obtained by lengthening or shortening the refuelling interval.

FUEL TYPE	FLUE	WINDOW	AIR WASH
Wood	Top or Rear	Plain	Yes

Please consult your dealer for more details.

RECOMMENDED SOLID FUEL TYPES

A Energy Rating

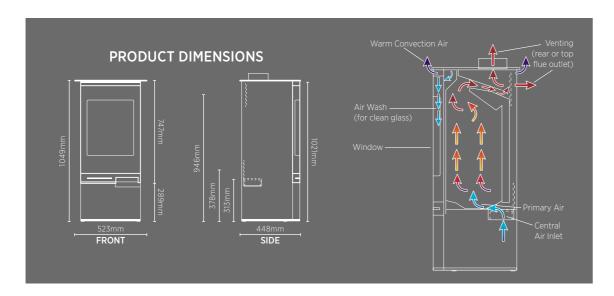

5.9kW

WESTBURY

The Westbury wood burning stove will draw the attention of everyone in the room thanks to its huge glass door and striking flame picture. With 78% efficiency and a nominal heat output of 5.9kW, the Westbury will comfortably keep the room cosy and warm. The Westbury is a Smoke Exempt stove, so it is fully approved to burn wood in smoke exempt zones.

FUEL TYPE	FLUE	WINDOW	AIR WASH
Wood	Top or Rear	Plain	Yes

Please consult your dealer for more details.

RECOMMENDED SOLID FUEL TYPES

Dry Seasoned Wood Logs (see page 5 for details).

PRODUCT SPECIFICATION

PLEASE NOTE - all solid fuel and wood burning stoves now require an energy rating label to be displayed on the product. All AGA stoves are third party certified and comply with the Ecolabelling requirements. All of our AGA Stoves achieve an A or A+ energy efficiency rating. If you would like more information, please go to our website agaliving.co.uk.

Introducing our NEW Rayburn Stratus fire suites and electric fire collection

There are few things as relaxing and evocative as watching a real fire flicker away. The mix of cosy warmth and beautiful flames guarantees to make even the chilliest of days snug and comfortable. The new collection of Rayburn electric fires has been designed to emulate the restful appeal of the real thing. Offering the ultimate flame picture combined with controllable heat, a Rayburn Stratus fire gives both the look and cosiness you'd expect along with ease and efficiency.

It couldn't be easier with our new range of fire suites to create the perfect focal point for your home. Available in three chic and stylish designs to fit all variations of the Stratus electric fires – there's something to suit every home. They need no building work and you don't need a chimney or recess. They're perfect for spaces where there are building restrictions and allow you to enjoy the welcoming appeal of a fire wherever you live.

Rayburn Stratus fires and fire suites are manufactured to the highest possible quality and the Stratus fires have vibrant, variable multi-coloured flame pictures, which allow you to set the style and mood, meaning you have a truly unique fire. With only a 13amp supply needed for the Stratus fires, you are guaranteed an easy installation for your home

RAYBURN STRATUS SLIM AND EXTRA SLIM FIRE SUITES AND FIRES

These beautifully designed suites will fit both the slim and extra slim range of Rayburn Stratus fires. The fires offer the ultimate choice in slimline fires and are available in a variety of sizes to suit your home.

RAYBURN STRATUS EXTRA TALL FIRE SUITE AND FIRES

Fires in this range offer increased height and surface area to create a real style statement. The Rayburn Stratus fire suite has been designed to perfectly showcase the fire for a real aesthetic appeal.

RAYBURN STRATUS TRU VIEW FIRE SUITE AND FIRES

The Rayburn Stratus Tru view fire suite and fire offer a unique range of fires that give you the option to showcase a 3 sided view of the stunning flame pictures. With a deep fire bed and over 60 flame pattern variations available, you can truly personalize your fire for your home.

Nominal efficiency and outputs based on refuel every 1.5 hours for wood and 4 hours for solid mineral fuel. All solid fuel AGA Stoves are tested to BS:EN13240 and HETAS approved.

AGA STOVE FLUE REQUIREMENT: Class 1

NOTE: Bituminous coals do not have the same consistency of grade as other solid fuels. Accordingly, please use only those on selected list

available from your stockist or heating engineer and only burn them on a medium or high setting. If the appliance is being operated on wood at a low setting for long periods excess tarring will result.

We recommend that you consult your AGA stockist or qualified heating engineer before making your final stove choice, to be sure the heat output and choice of fuel is most suited to your needs.

HELPFUL ADVICE

There is an AGA stove to suit every size and style of room. We recommend that you discuss your requirements with an appointed AGA authorised stove stockist, who will be happy to advise you on the heat output and choice of fuels best suited to your needs. For more details on AGA Stoves or for help in choosing the right stove for you, please contact your local authorised stove stockist dealer.
