

# KAELO

# LOVE EVERY SIP

Kaelo creates award-winning products that integrated into any surface to keep drinks chilled & every sip at the perfect temperature.

Powered by global patented technology.

Creates a new social experiences, wherever the location.

*We call this part  
the 'Crown'*

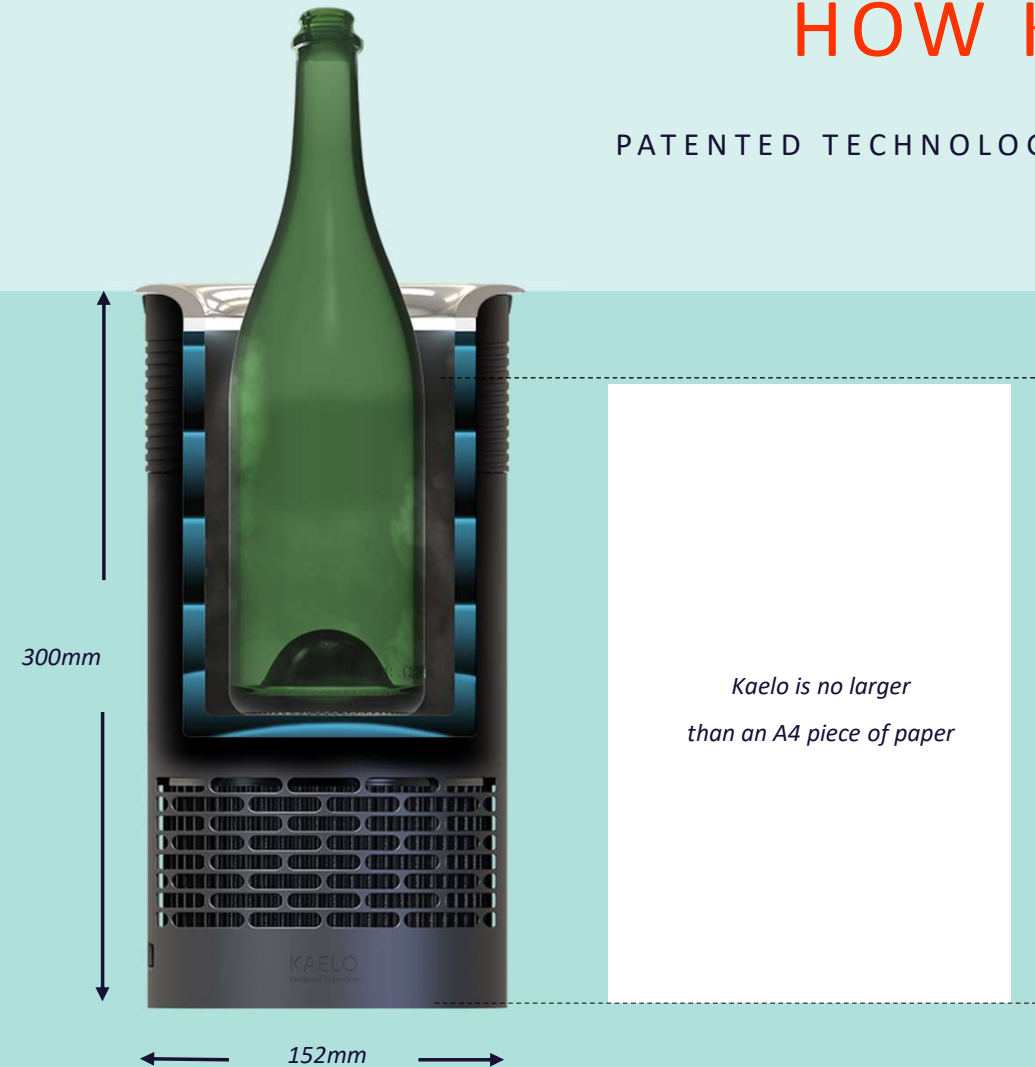

*The rest of Kaelo is hidden  
under the worktop. It's smaller  
than a sheet of A4 paper*

# HOW KAELO WORKS

PATENTED TECHNOLOGY. ENERGY EFFICIENT. DEMO MODE

<https://vimeo.com/649927268>

## HOW KAELO WORKS

1. Put a cold bottle in Kaelo
2. Kaelo creates a jacket of cold air that wraps around the bottle, maintaining the original temperature of that bottle
3. For example, if you take a bottle from the fridge at 5 degrees, Kaelo will keep it at 5 degrees. If you place a bottle in that's 10 degrees, it will keep it at 10 degrees
4. Kaelo's technology keeps the bottle completely dry – no ice or drips like an ice bucket
5. Energy efficient.
