

LAUNDRY

WASHING MACHINE KEY FEATURES

Washing Machines at a glance

ProfiEco motor

Powerful and economical: Quiet, powerful energy-saving wash with Miele ProfiEco EnergySave motor. Long-lasting.

SingleWash

Efficient solution for individual items: Wash a favourite blouse faster, more economically and more gently than ever.

Spin Speed

You can alter the pre-set spin speed of a wash programme. At this high spin speed, the residual moisture level is only 43% or 44% after spinning, making subsequent tumble drying very economical.

Gold standard for virus hygiene

Hygienically clean: TwinDos and PowerWash reliably remove over 99.9% of viruses, such as Coronavirus for example.

Cap Dosing

Miele offers small portioned capsules that are simply placed in the fabric conditioner compartment for textiles requiring special care. The Miele washing machine automatically dispenses the contents of the Caps at the perfect point in time during the wash process.

Networking with Miele@home

Make your life smart: Thanks to Miele@home, you can cleverly network your domestic appliances for more options.

Hygiene

AllergoWash*: This option should be used where high standards of hygiene are required. More energy is used to lengthen temperature holding times and more water is used to increase rinsing efficiency. Dust mites and bacteria do not stand a chance with a higher water level and an extended temperature holding time.

SteamCare

Enjoy 50% less ironing after a wash programme, or as a separate smoothing programme. It gently removes creases from the most delicate items, and it is environmentally friendly.

TUMBLE DRYER KEY FEATURES

Tumble Dryers at a glance

Drum Load

Ranges from 1-7kg, 1-8kg & 1-9kg. Fewer creases, easier ironing: The honeycomb structure allows laundry to be dried gently and evenly.

EcoDry technology

The filter system and the maintenance-free heat exchanger keep energy consumption and run time low.

FragranceDos

Indicates if fragrance flacons can be used on the appliance. Freshness for all the senses: With Miele you not only have particularly bouncy but also beautifully fragrant laundry.

Perfect Dry

Always perfectly dried: PerfectDry detects the mineral content of the water and modifies the drying process.

HeatPump

Indicates if the appliance features heat-pump technology. Uses half as much energy as conventional condenser tumble dryers. Using a Miele heat pump dryer can considerably reduce not only your energy costs but also the burden on the environment. Complete delicate garment care with also particularly gentle drying.

Networking with Miele@home

Make your life smart: Thanks to Miele@home, you can cleverly network your domestic appliances for more options.

SteamFinish

Achieving perfectly tumbled textiles fast, this steam and heat smoothes your textiles before they leave the tumble dryer.

Steamer (B4826 Fashion Master)
10569390

Specifications

Ironing of hanging garments. Fitted with a removable brush. Can be used as an alternative to the iron.

€ R4⁴⁵⁵

Honeycomb structure soleplate

Perfect results: Steam on the honeycomb surface helps the iron glide smoothly and effectively over the laundry.

Non-stick soleplate

Perfect care: Sequins, prints, delicate fabrics and dark items are ironed without creating shiny patches.

Steam Jet

Very handy: Hanging clothes such as dresses, jackets or curtains are gently smoothed and freshened-up.

Guided first use

Just start: During start-up, the appliance guides you safely through the selection menu for language and water hardness.

4.0 Bar Steam Pressure

Professional ironing results due to 4.0 bar steam pressure
